A unanimous Board of Directors has appointed Michael Mortensen to the position of CEO of Union Engineering. Michael has been with the company for more than 13 years and held numerous sales positions, most recently as CCO and a member of the executive management since 2009. In addition to his role as CEO, Michael will continue to have line responsibility for sales and marketing operations.

Former CEO Kim Christian Dalum is leaving the company after having spent the past two years restructuring and streamlining the organisation. Kim has done an excellent job developing and enhancing internal procedures and business efficiency. I would like to take this opportunity to thank Kim for his efforts as outgoing CEO of Union Engineering.

Heidi Thousgaard Jørgensen who, like Michael, has been working in Union Engineering for 13 years, has simultaneously been appointed Deputy CEO and continues as CFO and a member of the executive management team.

With Michael and Heidi we have a strong and experienced management team in place. With their extensive knowledge of the entire business and with Michael's strong understanding of customer needs, Union Engineering will remain a world leader in CO₂ technology in a very dynamic and competitive industry, continuing to bring innovative and leading edge CO₂ technology to the market.

I welcome Michael and Heidi in their new roles and look forward to a mutually rewarding working relationship in the years to come.

Jens Thøger Hansen
Chairman of the board

Michael Mortensen
CEO

Heidi Thousgaard Jørgensen
CFO, Deputy CEO

World Leader in **CO₂** Technology
